

## CERTIFICATE OF ANALYSIS

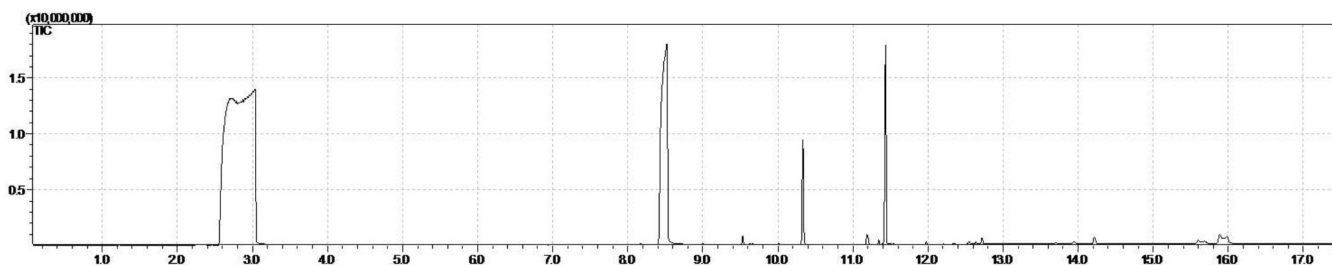

### Verification of the absence of diketones in flavors.

The purpose of these tests is make a screening of all the flavor components, compare the results with screening of Diacetyl, Acetoin and Acetylpropionyl, and confirm the absence of diketones in the following:

- FA1556A Zeppola flavor

INSTRUMENT: Gas Chromatograph Mass Spectrometer GCMS-QP2010 SE

### **SCREENING of Diketones**

**Screening of FA1556A Zeppola flavor.**

### Results

Based on the above analysis performed, no diketones were found on the checked flavors.  
We declare that because at the retention time of the indicated Diketones there is any retention peak.

We inform you that we do not use Acetylpropionyl in any of our flavors.  
You can check the presence of Diacetyl and Acetoin on the product description of all flavours on our website [www.flavourart.com](http://www.flavourart.com)

THIS IS A COMPUTER PRINTED DOCUMENT AND IT IS THEREFORE NOT SIGNED.
